

**Asset
Management
made easy !!**

Proteger

By GEOGO

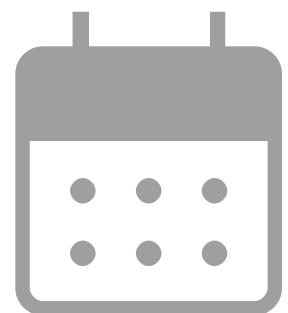

Traceability of your
Instruments going out control ?

Unable to qualify for ISO 9001
certification?

Loosing Track on your
calibration schedules ?

Uncertainty of measurements
done by uncalibrated
instruments ?

**You need a system to
manage this.**

A simple, easy to use software system that
can capture, code and maintain transactions
of your assets on the go can make the daily
operations and audit process smoother.

Proteger

Calibration

ISO Compliant Calibration Management App that gives every Maintenance and Quality team the tools and information to run production with 100% calibrated Instruments & Tools

Key Features

Easy to Use

Mobile-first, and easy to use technology to help Quality Managers to be more efficient

Central Database for Tools & Assets

Efficiently manages all Instruments & gauges from a single central database which can be accessed anywhere, anytime.

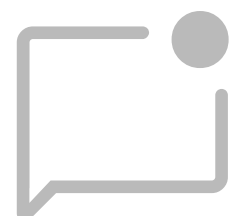

QR coded instruments

All instruments/tools will have QR coded labels to scan and collect calibration history by just a scan from the App.

All Reports from a single place

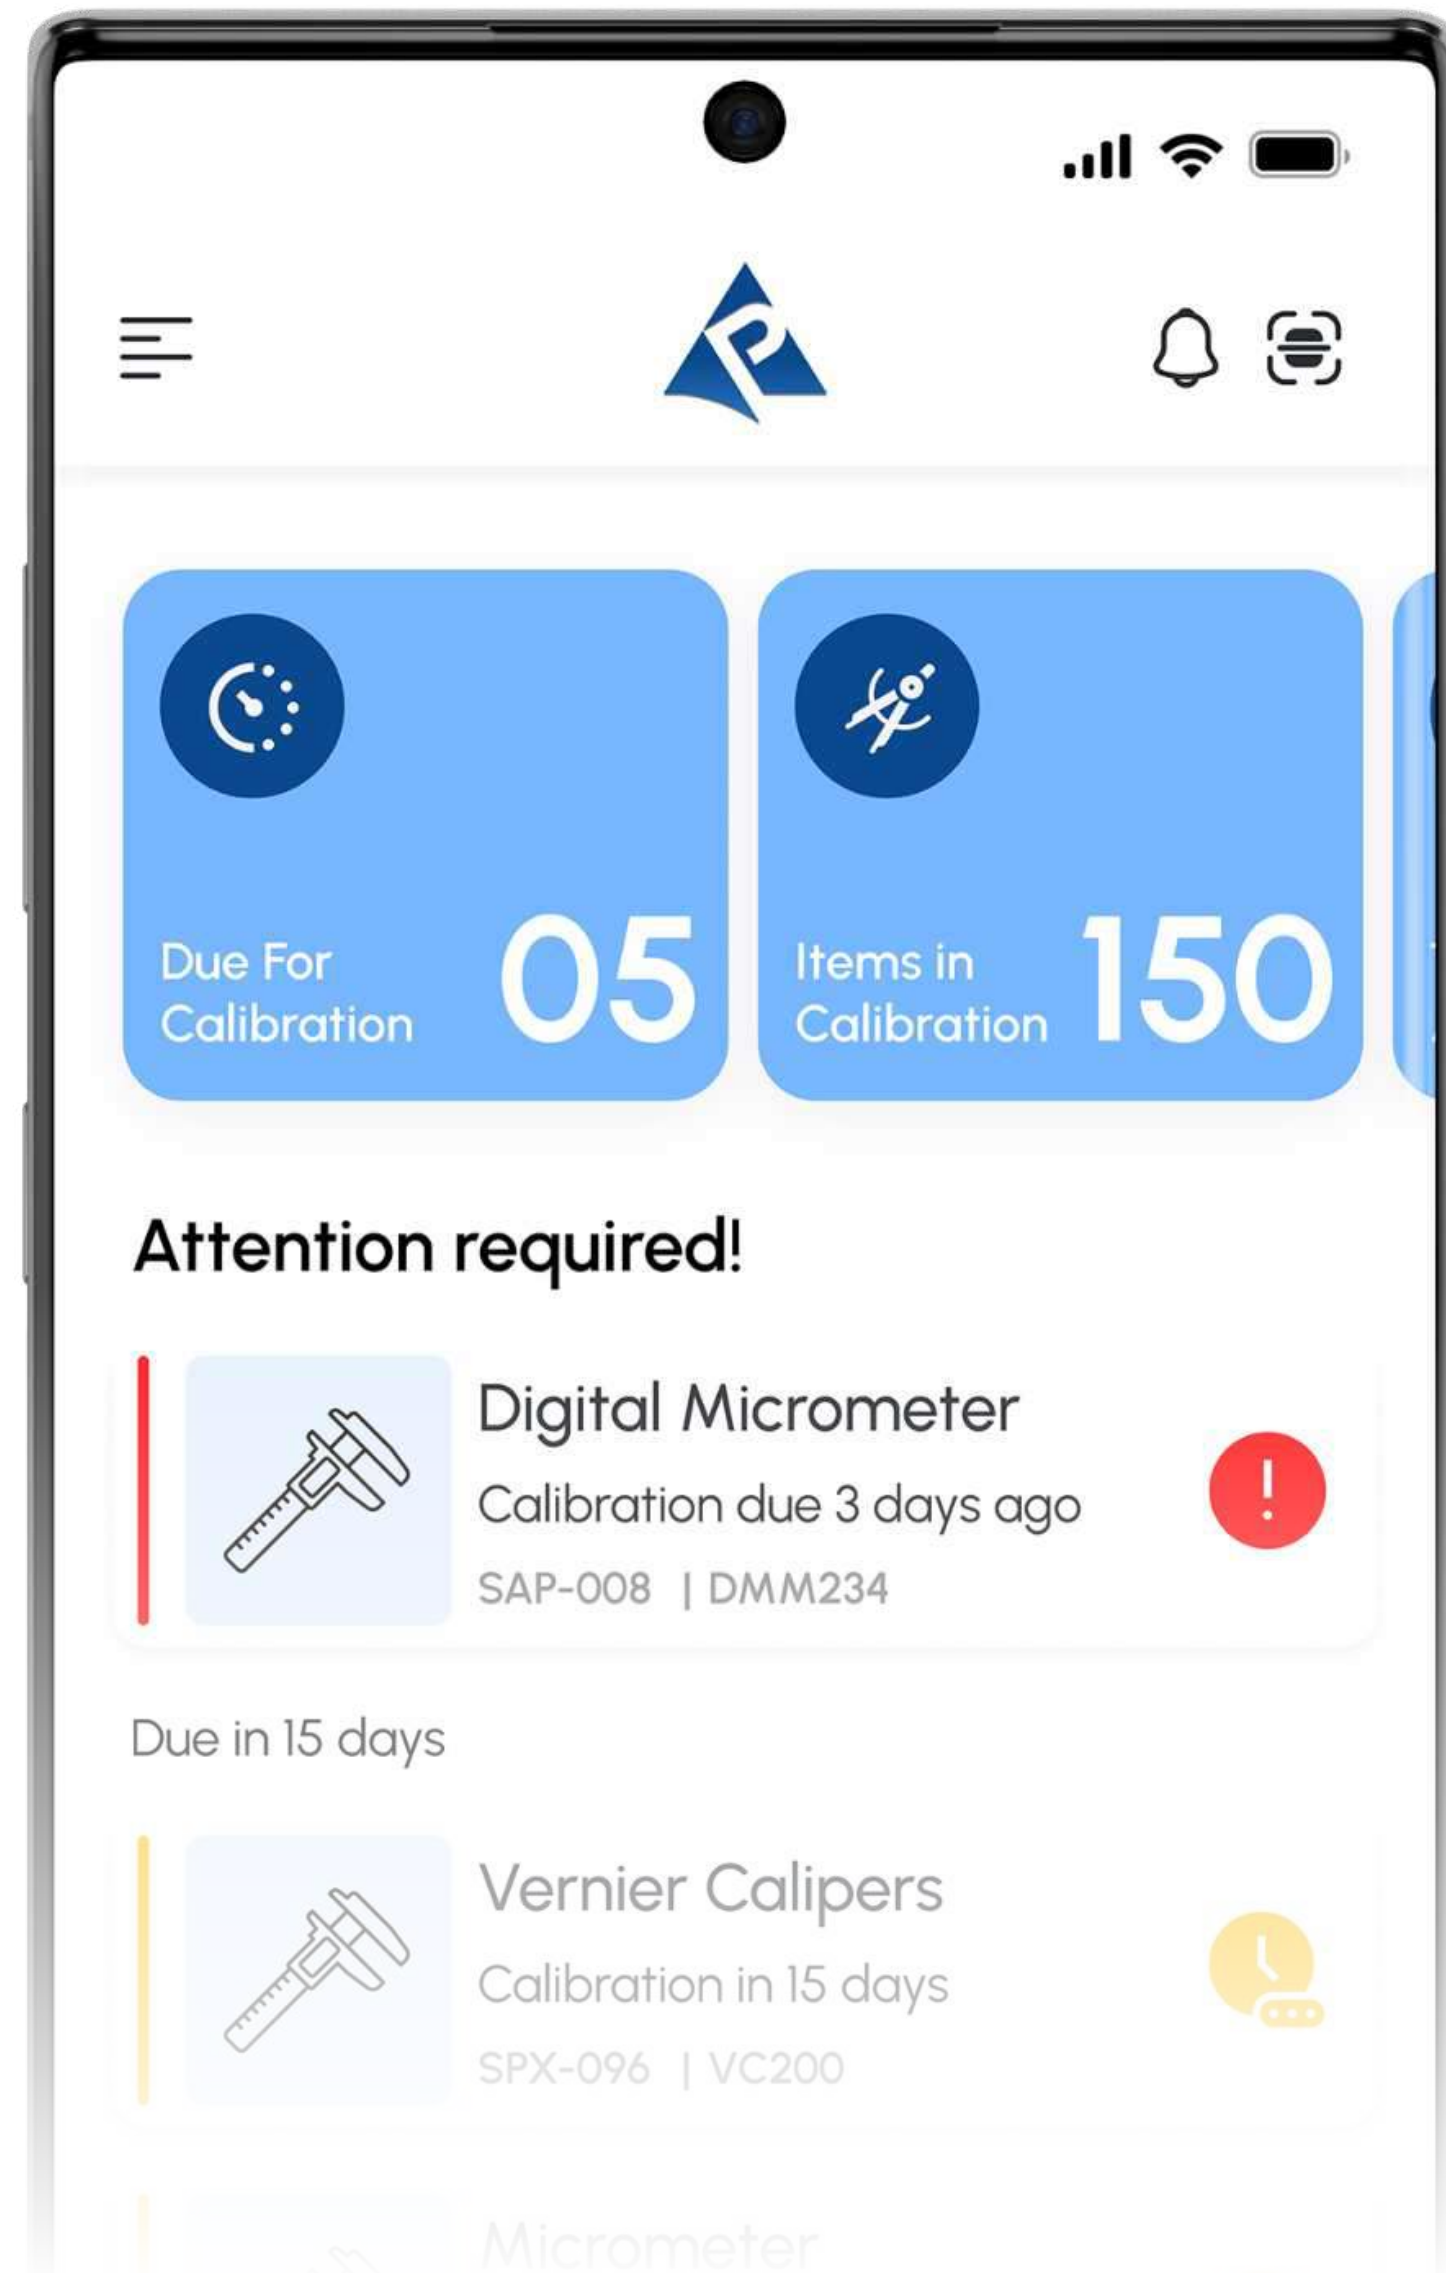

Collect all reports linked to your Instruments& Calibration to make faster business decisions

Alerts

Real time alerts to help you stay updated on tool calibration dates beforehand

Benefits

- ✓ Conduct Quality Audits without halting your Production.
- ✓ Use 100% calibrated tools in Production
- ✓ Get Instrument History with just a QR code scan
- ✓ Prepare Calibration Report for all instruments on click of a button
- ✓ No setup & installation needed. Accessible from browser & mobile App.
- ✓ Assisted support from PROTEGER Team
